

There is no way that the no call policy should be lessened. If anything it should be made stronger! It is harrassment plain & simple when your phone rings 20 times a day because of people trying to sell things. They should NOT have the right to call you at home or work for any reason. I do not enjoy being solicited and hate answering unwanted calls. I think that any business whether for profit or charities should remove your phone number from their list when asked. What about our rights? Why should it be legal to be harrassed? Please, make these laws STRONGER!!!!!!! They should never be lessened.
